

Regal Cinemas @ Thornton Place

TK Architects, International

Wards' Masonry, Inc.

The focal point of the Thornton Place commercial community is **Regal Cinemas**, with 3,000 seats, 14 screens, including IMAX.

The interior called for "Pro-Fit LedgeStone", Southwest color by Cultured Stone. The stone supports the neon light columns at each theater's entryway, frames the movie marquees and restroom doorways and was used to create an attractive "Guest Services" kiosk.

The exterior is 10,000 units of ground face CMU, natural color by Eastside Masonry.

We constructed a 900 space underground parking garage with 10,000 units of ground face CMU.

Masonry was the ideal choice for Regal Cinemas. Inside and out, underground and above, the combination of Cultured Stone and CMU is the perfect combination of beauty and cost efficiency.
